RIPE NETWORK COORDINATION CENTRE

# Introducing the RIPE Forum

A new way to participate on  
RIPE community mailing lists

# History

- Feedback from surveys and direct conversations with community members
- Need for a modern way to interact with the mailing lists
- Desire to bring new community members into Working Group discussions and policy making

# Solution: The RIPE Forum

[»](#) You are here: [Home](#) > [Participate](#) > [Join a Discussion](#) > [RIPE Forum](#)

Beta RIPE Forum v1.2b

## RIPE Forum

The RIPE Forum is an additional way to participate in RIPE community mailing list discussions using a web-based interface rather than an email client. Everything you post here goes to the mailing list and everything posted to the

# Mailing Lists Don't Change

- Existing mailing lists will remain unchanged
- Light-weight system, optional and decoupled
- All discussion still goes into the same place
- Keep interacting in the same way as always
- But we hope you'll try out the web interface!

# Technical Details

- Web application — Pyramid Web Framework
- Read-only access to archives in Mailman
- Post and subscribe via RIPE NCC Access

# Usage Statistics

- RIPE Atlas mailing list for the past two months
- Very positive comments and requests for sharing the code (maybe in the future!)
  - 17% of all list messages in the time period
  - Hundreds of page views
  - Visits average around four minutes
  - Very low bounce rate

# Available Now!

- Check it out at the following address:

<https://ripe.net/s/ripe-forum>

- Testing List:

<https://www.ripe.net/participate/mail/forum/ripe-forum-test>

- Let us know what you think!
